

WHY GUTTER PROTECTION?

- Cleaning gutters is a dirty and dangerous job. Overflowing gutters are dangerous to your home.
- If rain water is not properly channeled, it will cause erosion of landscape, walkways and foundations.
- Unchanneled rain causes mold and mildew growth, and may end up in your walls and basement!

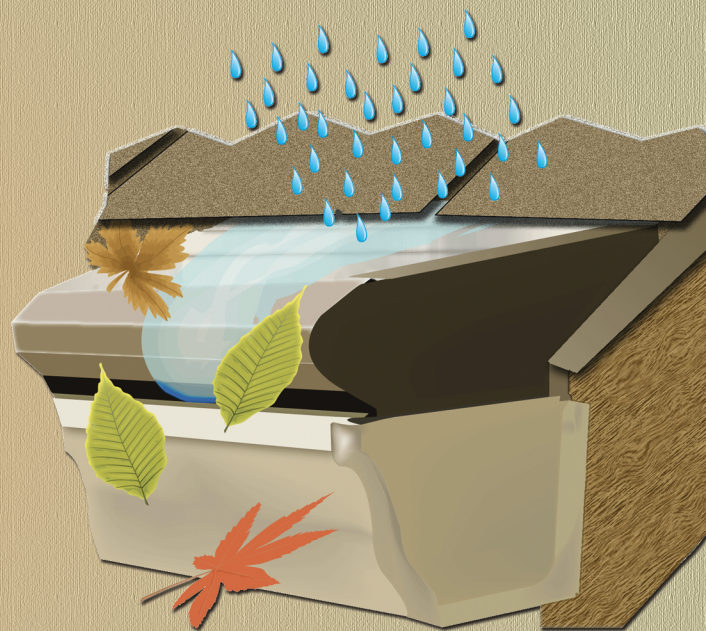

WHY GUTTER HOOD?

- Guaranteed to keep gutters free flowing. The best gutter protection system on the market today.
- Compare and save THOUSANDS! Gutter Hood uses the same profile as the leading national brand.
- **"Never Screw Into Your Roof Again!"** Our patented bracket eliminates hundreds of holes in your roof and doesn't void your roof warranty.

**PROFESSIONALLY
INSTALLED BY:**

**"DON'T WASTE YOUR TIME
CLEANING AND REPAIRING
YOUR GUTTERS EACH YEAR."**

HOW IT WORKS

Surface tension is the tendency of liquid molecules to cling to solid surfaces, such as water down the side of a fountain, or a penny floating in a glass of water.

Gutter Hood's nose-forward design utilizes the force of surface tension to keep your gutters clear of everything except rain!

Rainwater wraps back around the nose of the Gutter Hood and into the gutter, allowing leaves and debris to slide off onto the ground.

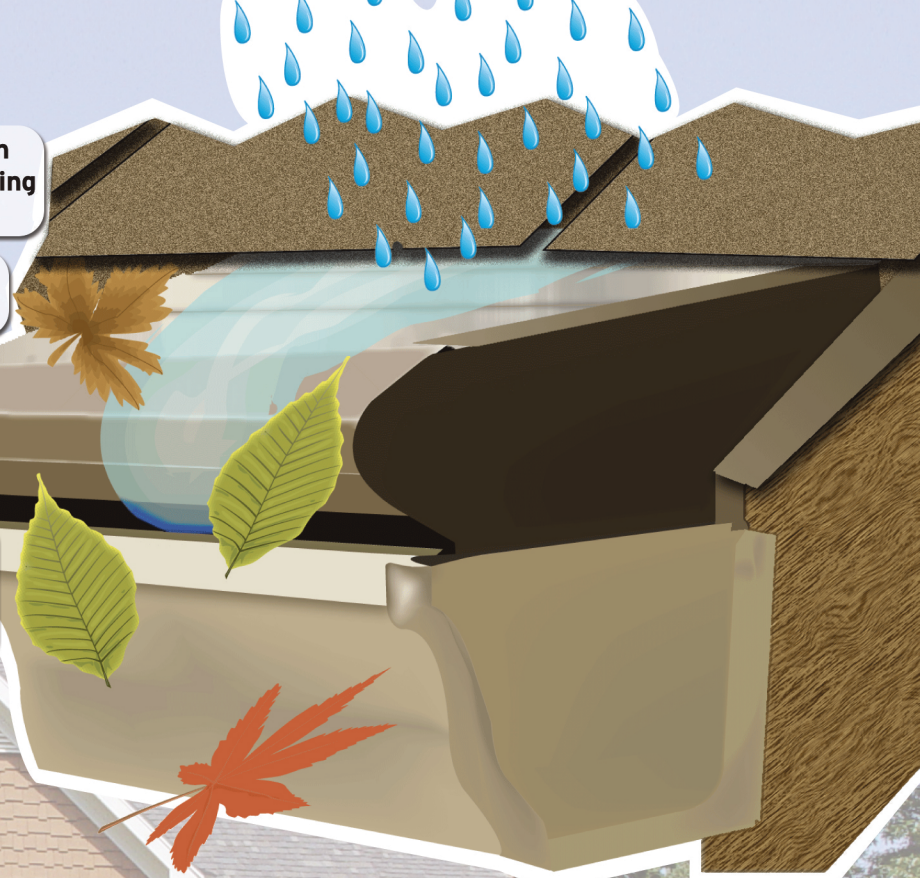

The flow-limiting ribbed design slows and spreads water, causing it to sheet instead of bead.

Drains at 22" of rain per hour!

30 year proven nose-forward design channels rainwater in, while keeping leaves and other debris out.

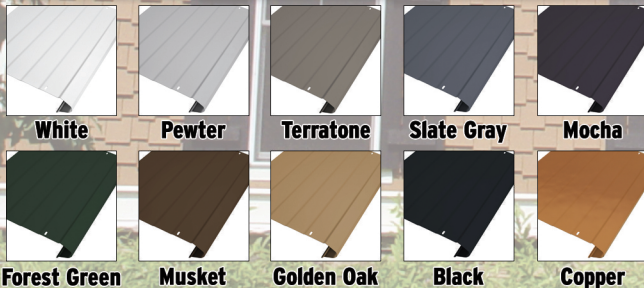

High-performance alloy with tough-wearing Kynar 500 finish available in 9 designer colors!

A DANGEROUS JOB

Not only is gutter cleaning down right dirty, it can also be very dangerous. Each year, hundreds of homeowners are injured, paralyzed, or even killed cleaning their gutters.

Ditch the ladder, and get Gutter Hood.

SUPERIOR BRACKET

- ✔ Screws to your fascia, unlike other brands which usually nail to the top of your roof!
- ✔ Only guaranteed "nose forward installation" in the industry.
- ✔ Self supporting design distributes all weight directly to the bracket.
- ✔ Strengthens and reinforces your existing gutters.
